Tell me lady, shining sun
To feel the warmth that's comes undone
Do you sleep in sympathy
And if its true walk with me

All of the while you were here
All of this time you were near
And hold my tears

Come on lady walk with me
Come on lady talk to me
Can't you see I'm all alone
Loneliness I can't condone

Come on lady hold my hand
Take me to your shadow land
Sleep awhile in sympathy
Come on lady walk with me

In the twilight the idols speak
And in the twilight you'll always seek
A sentimental forgotten friend
Who's gonna love you until the end

All of the while you were here
All of this time you were near
And hold my tears

Come on lady walk with me
Come on lady talk to me
Can't you see I'm all alone
Loneliness I can't condone

Come on lady hold my hand
Take me to your shadow land
Sleep awhile in sympathy
Come on lady walk with me

And now you search for the ideals
You'll find a vice that always heals
The open wounds, the bleeding hearts
And still they'll say you're torn apart

All of the while I was here
All of this time I was near
And hold my tears

Come on lady walk with me
Come on lady talk to me
Can't you see I'm all alone
Loneliness I can't condone

Come on lady hold my hand
Take me to your shadow land
Sleep awhile in sympathy
Come on lady walk with me

Come on lady walk with me
Come on lady talk to me
Can't you see I'm all alone
Loneliness I can't condone

Come on lady hold my hand
Take me to your shadow land
Sleep awhile in sympathy
Come on lady walk with me, yeah
Me, yeah , me yeah right
