Yo if you don't know what the world means to me  
Things change and rearrange  
Friends aren't friends anymore  
People go behind your back to score on anything  
Will we ever have peace  
Someone tell me please

You know you will see on the block  
Kids playin hearin gunshots  
Never phased by the crimes that they witness  
Follow me and come and see how it got this way  
Young mama right there  
Don't be cussin at your kids right there  
Put the right foundation right here (teach respect)  
So they can be

Most high (most high)  
Most high (most high)  
Most high (most high)  
Like an angel in the sky  
Most high  
Most high  
Most high

Like an angel in the sky  
Brother why you act that way (why you actin that way)  
Call your girl woman not her name  
Bringin kids in the world unclaimed  
You should know that don't make you a man at all (not  
at all)  
Young father out there (listen up)  
Don't abandon your seed out there (show we care)  
Let's get one thing clear (for real)  
Family should be

Most high (held high)  
Most high  
Most high

Like an angel in the sky  
Most high (it's the most)

Most high  
Most high  
Like an angel in the sky

It doesn't matter where you are  
You're still a shining star (for real)  
It doesn't matter where you're from (it doesn't matter  
where you're from)  
Let's give love to everyone (start showin more love)

Hustlers put down your guns (put em down)  
Self-respect is the best weapon  
Spread love show your real value  
Set a true example by starting with you  
See them kids right there  
Don't be shootin round them kids right there  
Gotta show there is hope out here  
Train yourself you can be most high

[DMX]

I only walk in the dirt, but my steps are guided  
And not matter how dark my path gets, I light it  
I ain't never been ashamed of the pain, cant hide it  
Yet da road was rough but I decided to ride it  
Step carefully, wit half of me walk wrecklessly  
That's just an x n me, cats getted popped like ecstasy  
Yo money jus sounds just like you, oh you jus an extra  
me  
Give or let me fly or gimme death  
Words that I try 2 say with my last breath  
And if my last breath aint long,  
I thank the lord for my life  
That way my last breath aint wrong  
You not keepin money with the hood right there  
You dont really wanna go right there  
You gonna get left right there  
You be takin your last breathe right there
