Magic Magic Magic

Its like magic, woohoo

Its like magic, woohoo

Another lonely day another lonely night
Here we go again out of touch and out of sight
This is the story of boy meets a girl
Lost and alone in a great big world
Lonely downhearted feeling the pain
I never thought I could be this way
It doesn't matter what you say
It doesn't matter what you do
You feel the thunder
Then you're under the spell
And only time will tell

If it's magic magic magic
Magic magic, Is it magic? Woohoo

I'm talking in my sleep
Living in a dream
First you cast your spell
One kiss and I fell
Now only time will tell

If it's magic magic magic
Magic magic, is it magic? Woohoo

All my life I was waiting for a girl like you
Now that you're here what can I do
Since you came along you said it all
How was I to know that I could fall

Into your magic magic magic
Magic magic, is it magic? I don't know
Only time will tell
