I've got a bone to pick with you cos you're lovin' every
minute of the day
Lost in a space between the lines, seems like life
begins at forty anyway
Must be a case of spot not feather, even though they're
boxed together
(The orchestra is dead)

Emil's Ja'causezi - starting to lose me - didn't I warn you
(Floating down the river once again)
Solomon Juneau - someone that you know - how we
adore you
(Floating down the river once again)

I've got a plastic cross to bear, gonna pick it up and
crash into the sun
Fly on a rare collision course when the race is over just
as it's begun
Scientists will pay for this and rue the day they ever
tried to change your world

Emil's Ja'causezi - starting to lose me - didn't I warn you
(Floating down the river once again)
Solomon Juneau - someone that you know - how we
adore you
(Floating down the river once again)

Ave Neru Salam - your secret life is written in your hand
Toy guns for everyone - you're needed now, a change
is gonna come

Scientists will pay for this and rue the day they ever
tried to change your world

Emil's Ja'causezi.....
