Groove is where you find it, takes time to realize it  
Move in to the middle of your mind  
No one can deny it, the truth is where you find it  
Move in to the middle of your mind

Are we just losing time  
The earth is getting old  
Are we just fusing time  
Orbit round the world  
In the middle of our minds

Why are you denying, the truth is underlying  
Move in to the middle of your mind  
Space is still colliding, face what you've been hiding  
Groove is in the middle of your mind

Are we just losing time  
The earth is getting old  
Are we just fusing time  
Orbit round the world  
In the middle of our minds

Can I ask you a personal question?

Are we just losing time  
The earth is getting old  
Are we just fusing time  
Orbit round the world  
In the middle of our minds

Groove is where you find it, takes time to realize it  
Move in to the middle of your mind  
Space is still colliding, face what you've been hiding  
Groove is in the middle of your mind, of your mind
