I've been reading too much,
I've been thinking too much.
Scientists telling us salt's as bad as cigarettes.
And sugar is like cocaine?
Should I ever feel like I have to explain myself to
anyone?
I've been reading too much,
I've been thinking too much.
I've been missing the way things were too much.
I've been missing the way I was too much.
At night I think myself to sleep.

Because sometimes...okay more like everytime...
I swore it was the last time I just end up doing it again.
Because sometimes...okay more like everytime...
I swore it was the last time I just end up doing it again

So just bury me in your backyard
in a box full of things you couldn't completely part with.
Because we both know that I don't deserve this.
Because we both know that I don't deserve this.

I've been smoking too much,
I've been drinking too much.
I've been thinking about myself too much.
I've been thinking about you way too much.
At night I think myself to sleep.
I've been reading too much,
I've been thinking too much.
I've been missing the way things were too much.
I've been missing the way I was too much.
I'll probably over think myself to insanity.

Because sometimes...okay more like everytime...
I swore it was the last time I just end up doing it again.
Because sometimes...okay more like everytime...
I swore it was the last time I just end up doing it again

So just bury me in your backyard
in a box full of things you couldn't completely part with.
Because we both know that I don't deserve this.

we both know that I don't deserve this.
So just bury me in your backyard
in a box full of things you couldn't completely part with.
Because we both know that I don't deserve this.
we both know that I don't deserve this.

Wake up.
Are you dreaming?
Wake up.
Are you dreaming?

So just bury me in your backyard
in a box full of things you couldn't completely part with.
Because we both know that I don't deserve this.
we both know that I don't deserve this.
So just bury me in your backyard
in a box full of things you couldn't completely part with.
Because we both know that I don't deserve this.
we both know that I don't deserve this.

Because sometimes...okay more like everytime...
I swore it was the last time I just end up doing it again
