I don't know you but I know what you did to her  
She told me and I happen to believe her too

They will be 3 steps behind  
You will not know what's got you  
Oh so you're sorry now  
All is not well, it's not ended

Hold your breath til its over  
There's something left underwater

You've been quiet, there are things that you do not  
speak of  
But if you stay gone a little longer your keys won't work

Cause I will be 2 steps behind  
You will not know what's got you  
Oh so you're sorry now  
All is not well, it's not ended

Hold your breath til its over  
There's something left underwater
