"Empty space"

Visit "[Empty space](#)" on MotoLyrics.com

Standing motionless beneath the sun
The lights won't change and the engine burns
Beyond there lies a steady pace
That's where i look to
Eye on the clock
And tomorrow nears
Do I patiently wait
Through the passing years?

Every day is like empty space
Freedom lied
It haunts this place
Although the signs say less is more
I still hope for your fair rays of light
Upon my door

Through the confines of the city scape
I can see the future taking shape
Watching aircraft span the evening sky
Like rivers flowing
Making turns for open roads
I've been lost in the spin
Don't know where to begin

Every day is like empty space
Freedom lied
It haunts this place
Although the signs say less is more
I still hope for your fair rays of light
Upon my door

I still hope for your fair radiant light
