"Speed Of Light"

Visit "[Speed Of Light](#)" on MotoLyrics.com

Drive an easy road
If you're looking for direction
Don't forget to set your seat and go
Take an easy road
All you need is information
Everything is there to know

Only you and me add up
Only you and me add up
Speed of light stars and planets
Taking over understand it
Speed of light stars and planets
Taking over understand it

Need a changing face

When the wind's around you blowing
Don't forget to let your feelings go
Wasting space
If you're looking for persuasion
Everything you need can grow

Only you and me add up
Only you and me add up
Speed of light stars and planets
Taking over understand it
Speed of light stars and planets
Taking over understand it
