The first time I won't regret
One look into your eyes and I'll never forget
You're not about to jump right into this tonight
I'm wondering just what to do
Every single second in the room with you
I can't talk this over to win you over here tonight

So open your eyes don't say goodnight
I'm wondering why alone tonight
I'll just let it go for you

I'm letting you down
You were just hiding it so well
You're giving me no sign no interest
You don't really want this
You don't really want this

Right now
Are you gonna try to save yourself
I bet you're so sick of hearing it
Well you don't really want this
You don't really want this now

So hard to get is that what it's gonna be
Sitting down not even looking at me
I hope forever I don't remember this tonight
So out the door gone away
Run so fast through the pouring rain
We're gone forever so much better here tonight

So open your eyes don't say goodnight
I'm wondering why alone tonight
I'll just let it go for you

I'm letting you down
You were just hiding it so well
You're giving me no sign no interest
You don't really want this
You don't really want this

Right now

Are you gonna try to save yourself
I bet you're so sick if hearing it
Well you don't really want this
You don't really want this

I'd throw it all away for you
If you took another look
You'd be back so soon
All alone dark cold night
Wrapped around you better hold on tight

Ah-ah-ah
Ah-ah-ah
Ah-ah-ah-ah-ah-ah-ah
Ah-ah-ah
Ah-ah-ah
Ah-ah-ah-ah-ah-ah

Down
You were just hiding it so well
You're giving me no sign no interest
Well you don't really want this

So right now
Are you gonna try to save yourself
I bet you're so sick of hearing it
Well you don't really want this

I'm letting you down
You were just hiding it so well
You're giving me no sign no interest
Well you don't really want this
You don't really want this

Right now
Are you gonna try to save yourself
I bet you're so sick of hearing it
Well you don't really want this
