[Verse One] [Manifest] Most time's ? changes It's hard to think straight I struggle with humbleness to become great, yes Fest is me Take it or leave Got to get it to receive it We always say it but do we really mean it? When the concern for self goes beyond the concern for health I'm no better than the next man in my pursuit of wealth And this desire is a part of me And I got a have it when life decide to charge a fee Understand, until I'm comfortable, it's all about Fest Scheme after scheme, my mind will never rest With a ? burden I hold dear But I'm way too bold or proud to show fear Not that rap is an answer but it damn sure helps To deal React when more hands are dealt And there's No doubt in my mind I'll survive it It just may not be when I'm alive, think about it Never stop movin' up, pushin' on I aim to be appreciated before I'm gone Hit the lab everyday, try to write, compose the perfect song I want the worlds to move a world, for that can I be wrong?

[Chorus] [Blueprint] Life is turmoil from start to finish Forget to watch your back, you'll be quick to get it Then every turn you take, will be a turn for the worst You. Must. Learn This rap music is a part of me No different than an arm you see Keep swords sharpened Radar on for targetin' You. Must. Learn

[Verse Two] [Blueprint] Something's wrong With the way that we live These gas prices make me wanna stay in the crib It ain't my fault, it's something that the president did It's dangerous now, you even go play with your kids These terrorist's is wild Flyin' planes into shit So what's next? I heard they wanna take out a bridge Paybacks a bitch And America's got it comin' What comes around goes around You can't run from it Can't fly, can't walk, can't drive your car Won't bend, won't budge, won't fight in the war I'll pull a Cashius Clay Before you ever see me enlisted Cause nobody Arabic ever called me a "nigger" Or made my people live their lives out in fucked up conditions Looked upon suspicious cause the color that their skin is But in these other countries it don't make a difference Cause television got 'em thinkin' all Americans is ignorant Meanwhile Back at the ranch I try to stay out the grasp Of the unseen hand

Constructing plans to touch these fans The thing I know
I can control is if my music got soul The Bible says the
meek shall inherit the earth The positions of the rich
and poor will be reversed And I believe that to be true
for what it's worth Cause the terrorists is takin' out the
rich people first [Chorus] [Blueprint] Life is turmoil
from start to finish Forget to watch your back, you'll be
quick to get it Then every turn you take, will be a turn
for the worst You. Must. Learn This rap music is a part
of me No different than an arm you see Keep swords
sharpened Radar on for targetin' You. Must. Learn
[Verse Three] [Jakki the Motomouth] I look around And
all I see is war, disease and hate Still wonderin' what
we tryin' to achieve in space Tryin' to settle in a spot I
can't breathe awake Ain't even been to Cali yet, why
should I leave this place? For another planet or station I
watch how our secret government panic the nation A
scheme with fake Terrorist plots You don't have to care
if you not concerned Don't mind me You cattle, you
don't got to learn I got concerned when 9-11 came and
went The Pentagon was hit but never showed a plane
and since Then, I never showed the same resentment
You'll never know the pain I live with I never display it
Only He's who's higher than me knows what's goin' on
inside of my soul And that's who it's gonna stay with
We on high alert, I know why now Cause there's
terrorists in our country And a lot of 'em in the white
house {*echoes*}
