"Black Promises"

Everythings moving backwards
Its been that way for so long
When all my cries like butterflies
Drift slowly away
I cant relate to no one

Sifting through all my so called friends
Aint what I like to do
But give or take my wreckage past
Dies slowly away
And now the battles begun

(chorus)
Black promises, black promises
Face down in a hole, Im sinkin below
Till I face myself
Im letting go, so on with the show
Till I face myself

Nevermind all the pity
I rattle on all the snakes I knew
I chewed the bone, got criticized
And hid all the pain
Beneath it all I still face the same face

(chorus)(chorus)
