Let's go on holiday, we can be  
Anyone we want, anyone we want  
A new dress, we lose the stress don't you know  
Your struggles are gone, looking for the one  
It's no excuse for the animals, terrible  
What we've become under the sun  
Waking up, staying up  
Keeping you up all night

Stop the noise, stop the noise  
I wish that I could stop the noise (x2)

I spoke to the devil last night (What did he say?)  
What do you want? What do you want?  
Can you decide that you could help us and not just  
tempt us?  
The state that we're in is wearing us thin  
He said that when the ice came, when the floods came  
We were alone, but what do we know?  
A single man cannot build anything, anything  
The difference is when the millions were meant

Stop the noise, stop the noise  
I wish that I could stop the noise (x2)

To you in darkness, we want the daylight  
We could disappear anywhere, anytime  
You can't understand what we're doing here  
We'll just stay awake while the sun is out today  
All feeling starts to fade  
All the millions of signs to say  
Making noise was the way

I wish that I could stop the noise (x4)
