You say you've got troubles today  
I don't look at it that way  
I know the world has let you down  
but you can't let the fire inside you drown

Let the sufferers inspire you  
you can't let Babylon tire you  
Get together make it better  
you just can't change the weather  
ride on the eye of the storm

Love will help you on your way  
face every moment every day  
What good is peace with no justice  
I can't take one more broken promise

Love will never let you down  
I'll keep fighting 'til I'm six feet under ground  
Get together make it better  
just can't change the weather  
ride on the eye of the storm

Jah know all things best
