Taken in the night  
From my wildest dreams  
She was drawn into the light  
Where she became reality  
Now the days roll by like thunder  
In the lightfield maze  
Nature resounds as  
We're called to ground  
And brought into phase

When she holds me so close  
I swear I wanna die in her arms  
And she loves me so much I taste  
The paradise in her heart  
Like a shooting star

It's all about love  
The war we're fighting for  
It's all about love  
It's all about love  
The war to find a cause  
It's all about love  
She's beautiful, she's a princess  
No shoes on her feet  
I was haunted by the nightmares  
Til she came to set me free  
Now we live as one in the kingdom  
Where passion reigns  
In the midst of making love I feel it  
Coarse through her veins

With her touch and her sighs I get  
Adrenalised with desire  
As I stare in her eyes she makes me  
Energise in the fire  
Let the flames burn higher

It's all about love
