

## Ten Feet Deep "Little Girl"

Visit "[Little Girl](#)" on MotoLyrics.com

When you raised your head I saw a smile  
I grinned and cheered inside  
What was left unsaid to reconcile  
Was carried off in that lost car ride

Who's benefitin' from this?  
You can't find the tracks  
"Life's kiss," take it back

Little girl don't you try to fool yourself  
That's never been your style  
But won't you tell her? Testify!  
Cause all these years you've always been worthwhile  
Little girl

When you thirst for life so hard you drown  
I poured you more and we dropped the ball  
Who's benefitin' from this?  
You can't find the tracks  
"Life's kiss," take it back  
Greet the brand new day with hope and praise  
Comfort in change and trust the same  
From the morning rain the color stays  
Pain washed away along with blame

Little girl don't you try to fool yourself  
That's never been your style  
But won't you tell her? Testify!  
Cause all these years you've always been worthwhile  
Little girl

Little girl, the sun's come up  
You've always been the one early to rise  
I'd never tell you "hurry up"  
Cause all these years you've always been worthwhile  
Little girl
