

## Ten Foot Pole "Think Of Tomorrow"

Visit "[Think Of Tomorrow](#)" on MotoLyrics.com

Looking in the mirror, what's left to see  
Fragments of life, all the pieces are broken  
The sky ways open to conquer the moon  
I'm going to get there just watch me

Maybe tomorrow, I'll think of tomorrow  
Inspiring words the Dalai Lama prays for us  
Oppressor and friend, human understanding  
We can build a better world

Oceans of wisdom speak out loud  
We'll think of tomorrow  
Tomorrow's children come out and play  
When I have a kid of my own  
What will I teach him?

Prepare him to be all alone  
Because someday he'll be all alone  
I have tried all my life to find the answers  
But the only truth is what you feel inside  
What's inside

When will we ever get along?  
I sit by wondering  
Environmental consciousness  
You heard it all before

The present time is our future  
Think, think of tomorrow  
Tomorrow's children come out and play
