I watched the news just the other day  
and there's one thing I must say,  
It gave me a pain right in the middle of my head.  
The newsman came on with his face  
and told me about the big disgrace  
and let me know just how many people got dead.  
And I got down.  
It got me down.  
So I got up and turned it off  
and that left me alone with my thoughts  
and a great big pain right in the middle of my head.  
And I was confused.. (I didn't know what to do)  
Well, I watched a show  
just the other night  
and I must say something  
was not right.  
How come people on television's weird  
in the head?  
They won't show sex but they  
show a lot of killing  
I guess it would be better to show blood spilling  
than to let little Jr. see  
two naked people in bed.
