"Stay with me"

Visit "[Stay with me](#)" on MotoLyrics.com

A tired leaf falls to the ground
Losing all that it has known
Why do I feel the same?

I've lost my voice I've lost my breath
I've found a reason to regret
A thought so devastating

Stay here with me
You are all I need
I feel the life you breathe
Stay with Me

As soon as things slow down they fold
Leaving my soul feeling cold
Why should I be careful now?

'Cause if I've only learned one thing
It's to keep my dreams so big
That they live on when I'm gone

If only you could?

Chorus

Gone so far
I feel it fast
Memories beg
To make it last

Chorus

I feel the life that's leaving me
Stay with me
