"5 Needs"

Visit "[5 Needs](#)" on MotoLyrics.com

This one goes to all the disciples out there on the
journey that we call life
You know there's only 5 needs
And Kyle and I have compiled 'em
And awoken them into song
A song that we like to call the 5 needs

First you need the planet
Earth beneath your feet
You couldn't live an instant without that
Then you need the air
Oxygen to breathe
You couldn't live five minutes without that
Then you need the water
The icy cold water

Now, you need some love (love)
You need some love (love)

We only wanted to rock your world (We hoped that we
rocked your world)
The fifth need is to rock your world (We really wanna
rock your world)
It comes before food!
Ohhh
