First born

This infant with his mother's eyes

Is our first born

First child

This baby I hold in my arms

Is our first child

His smile will warm

On a cold winter night

And when life

Is stormy

His faith in me will make things right

First born

Asleep in his crib now

Is our first born

If the good Lord's willing

He'll bless us with many more

But our first born

Is the child we've been praying for
