Too bad band-aids,  
Can't mend an imperfect heart.  
Too bad a bridge can't reach,  
Because we're too far apart.  
Those two letters hurt me more than you can  
comprehend [N.O]  
Longing for those three words which I can't wait to hear  
again [I love you]

I close my eyes,  
I see your face,  
You're in my mind,  
But out of place.  
You're nothing but a delusion,  
Consequently my only solution.  
It hurts when I need you,  
It could kill, if I ever leave you.  
So for now I just want you in my dreams,  
And we can work on our imperfect scheme.

There isn't a word,  
In the dictionary  
That explains you.

Indescribably, extraordinary;  
These memories will never cease to bury  
Themselves within my heart,  
And throughout my mind.  
You're a blessing to all of mankind.  
I'll never be good enough for you.  
Imperfect, so what's it to you?

I close my eyes,  
I see your face,  
You're in my mind,  
But out of place,  
You're nothing but a delusion,  
Consequently my only solution.  
It hurts when I need you,  
It could kill, if I ever leave you.  
So for now I just want you in my dreams,

And we can work on our imperfect scheme.

My eyes keen, like a lifeguard on duty.  
You captivated me with your beauty.  
Uh-oh, oh-no, need cpr.  
So put your lips on mine and revive me.  
Get up, get up will you take this last dance?  
Just me, you, and a little romance.  
I hope you change your mind,  
I hope it happens by chance.  
I hope I don't wake up,  
I hope you withstand.

I close my eyes,  
I see your face,  
You're in my mind,  
But out of place.  
You're nothing but a delusion,  
Consequently my only solution.  
It hurts when I need you,  
It could kill, if I ever leave you.  
So for now I just want you in my dreams,  
And we can work on our imperfect scheme.

[Break]

I close my eyes,  
I see your face,  
You're in my mind,  
But out of place.  
You're nothing but a delusion,  
Consequently my only solution.  
It hurts when I need you,  
It kills, when I leave you.  
So for now I just want you in my dreams,  
And we can work on our imperfect scheme.
