*From the album: Rock A Little

I can't wait....

Yes I know you....

Sometimes she talks to him, sometimes when she's
only dreaming

Then when she wakes up, somehow, she still believes
him

Yes, I know you, though we've been out of touch

Yes, I know you, to be continued, it's too much baby

Chorus:

I can't wait, I can't wait

Well, I've got to know when I can see you again, now
baby

I can't wait, I can't wait

-Am I wasting my time while you make up your mind

Well, I can't wait, I can't wait

Yes, I know you

Though we've been out of touch

I can't wait, I can't wait

What can I do when I'm crazy for you

She wonders how many more hours her heart will feel
broken

In secret she says she needs to see him but no words
are spoken

Well, she dances around in a circle, she's got that
feeling now

Blame it on something at first sight, put the blame on
me if you want to

To be continued.....

Repeat Chorus

How will we feel twenty years from now?

Repeat Chorus
