Let me navigate your body
Tell me where , got it
(now take a left)
Let my fingers do the walking
Limbs do the talking
I'm mapping my directions, on you
Baby tell me what to do,
Is it left, is it right, should I meet you downtown
Tell me how you like it, I'ma come through
Take me over highway, exit in your drive way
Rising, slow
Tell me what's the shortcut, to your destination
Oh, yeah

I'll find you with my GP
(follow the road)
You ain't gotta tell me where you to go
I'll find you with my GPS, whoa,
I'll find you with my GP
(proceed south)
I can , make a move
I'll find you with my GPS
Let me navigate you whoa

When I pull upon your body,
I'll take it down , naughty
(caution, restricted access)
Let me map the situation, till you can't take it
I'ma make you wanna stay, on you, whoa
Don't stop, that's for,take the route 69
Let it get you there in time
Tell me how you like it, I'ma come through
Take me over highway, exit in your drive way
Rising, slow
Tell me what's the shortcut, to your destination
Oh, yeah

I'll find you with my GP
(follow the road)
You ain't gotta tell me where you to go
I'll find you with my GPS, whoa,

I'll find you with my GP
(proceed south)
I can , make a move
I'll find you with my GPS
Stop
(Recalculating route)

At the red light, baby take it down
(You will reach your destination in 1 mile)
Making your time, over nice and slow
(Don't stop)

I'll find you with my GP
(stop)
You ain't gotta tell me where you to go,
I'll make you say whoa
I'll find you with my GPS,
(yes like that)
I'll find you with my GP
(proceed south)
I can't wait to make you moan
I'll find you with my GPS
I'll never get you all the way home

I'll find you with my GP
(follow the road)
You don't ever have to tell me where you to go
I'll find you with my GPS, whoa,
I'll find you with my GP
(proceed south)
I can , make a move
I'll find you with my GPS
Let me navigate you whoa
You have reached your destination.
