Is there a cure for this pain
Maybe I should have something to eat
But food wont take this emptiness away
Im hungry for you my love

Well I made it through another day
In my cold room
On scraps and pieces left behind
I survive on the memory of you

All Of me is all for you
Youre all I see
All of me is all for you
Youre all I need

Is there a remedy for waiting
For loves victorious return

Is there a remedy for hating
Every second that Im without you

All of me is all for you
Youre all I see
All of me is all for you
Youre all I need

All this life is all for love
Its the only road Ill choose
And every street and avenue
Only one will lead me back to you

One Love, One Love, One Love
One Love, One Love, One Love
