ï¼’

I hear you whispering surrounded in silence  
Blue vibration  
I hear the waves singing in the distance  
Pure isolation  
I smile into the distance faraway from you  
We're in resolution  
I'm Dreaming, touching, breathing side by side, yeh  
Dive into the sky

Let's get away, fly awayã€€  
I found the path to paradise  
Shining spiral of gold  
Take my hand, find our way out

Heavenly stars above  
Just believe what's in your heart  
No border between us  
I can always feel you inside

Where ever we are

ï¼’

I see you, feel you, I'm your creation  
Ever lasting affection  
Life's an endless spiral going round  
Yes, we are in love

Let's get away, fly awayã€€  
I found the path to paradise  
Shining spiral of gold  
Take my hand, find our way out

Heavenly stars above  
Just believe what's in your heart  
No border between us  
I can always feel you inside

Where ever we are

ï¼”

Let's get away, fly away  
I'm feeling raindrops on my face  
Sun shines through the clouds yeah  
Rainbow all around us

I spread my wings, fly away  
The wind sweeps me off my feet  
Blowing me away yeah  
Trees whispering to me

I'm feeling free now

Let's get away, fly away  
I found the path to paradise  
Shining spiral of gold  
Take my hand, find our way out

Heavenly stars above  
Just believe what's in your heart  
No border between us  
Nothing can divide us

Where ever we are
