If you wanna fly with eagles son you need to learn to
live like one look at my life and look how little i've done
done done if you wanna fly with eagles son i love you
little baby but i've got to let you go you've taken and
you've taken till you've stopped to grow i'll watch over
you as you fly fly fly but baby i can't be your sky and
when you see that horizon you gotta believe in what
lays beyond and when you feel nothing but confusion
the wind against you can be used to fly on you gotta fly
- fly on you can plan and plan or you can just do dig in
deep and find your groove sing to your rhythm sing to
your pain pain pain let nobody take your voice away i
love you little baby but i've got to let you go and it's
hurting me worse than you will ever know but eagles do
as eagles have done when they want to fly with eagles
son
