"Night Wolves"

Visit "[Night Wolves](#)" on MotoLyrics.com

Where do you go to get your kicks
When the sun sets low across the sticks?
What do you take to get your fix
And leave it in the rear view?
Its in the rear view
Left behind
You dont look back for peace of mind
You uncurl just as I wind
Up with the night wolves
They come to me with yellow eyes
As the moon touches the sky
What do you do to ignore their cries
And leave it in the rear view?
Its in the rear view
Kicking up dust
You let it go and you adjust
As for me
Ill be
Up with the night wolves
I spend every day half asleep
Every night Im up counting sheep
The flock is mine and mine to keep
Im up with the night wolves
The tick of the clock the pains and the aches
The unpaid bills and the past mistakes
The cold of the night is coming through
I cant leave it in the rear view
The images wont let me be
What you dont notice I can see
As you rest youll find me
Up with the night wolves
