The way to school is too far  
but the amusement hall  
is right around the corner  
and mothers hidden cookie jar  
is enough for this  
But they won't let you in  
cause you'r not old enough to have an I.D.  
so should you rather by dope  
or have a drink ?  
You chose the first possibility  
and you are in time  
on the school yard  
where you can deal your commodities  
After the first school break  
you're sold out  
Now, stoned and tired you want to go home  
#and count your money  
Social Failure - you're 13  
The teacher was watching you too close  
decided to call the police  
Now you're busted  
on the way to the station  
totally stoned and paralyzed  
By interregation you demand the fifth  
and for the revenge  
you pissed all over the station  
because you're only 13  
Now they bring you home  
and your mother doesn't know  
what to do with you  
then they send you to a social worker  
who doesn't have a clue.  
Both of them are trying  
to tell you what to do  
and threaten to put you in a fester home  
And after four hours of discussions  
you promise you'll change.  
Social Failure - you're 13
