Up and decide.
Live for the dying need.
Lease for the dead.
They're killing sun to save this land.

Paralyzing, working for it's working to deceive.
Cross analyzing. Finding faults within ones mind.

Apparent you'll stay
Falling in it's crawling doorstep.
Chapel's defied
We've been through the darkest deep holes of death.

Pain evolves slow, learns me to suffer for.
It finds me the way, to the scar.
Fate is said. Say what you will.
Fear not to cope in pain.
Testing to fall, down toward secrets grow.

Working towards life.
You're finding out, live despair
Creeping towards pain.
Letting fall in spite.

Calling the dogs.
Calling the dogs.

Working towards life.
You're finding out, live despair
Creeping towards failure.
Letting fall in spite.

Calling the dogs.
