

Olsen Brothers, The

"San Francisco"

Visit "[San Francisco](#)" on [MotoLyrics.com](#)

When I look back, along the track
that left me here, when I'm standing
there is a place, where love begins
a certain town I left my heart in.

Chorus:

San Francisco love is all around
San Francisco you've never let it down
I have seen you open every door
San Francisco love is what we're here for

I'm eight miles high, and feeling free
and in my eyes, the sun is shining
The Golden Gate and Haight Asbury
I'm always California dreaming

San Francisco love is all around
San Francisco you've never let it down
I have seen you open every door
San Francisco love is what we're here for

I'm always California dreaming
San Francisco love is all around
San Francisco you've never let it down
I have seen you open every door
San Francisco love is what we're here for
