(Keith, Hannon)

Yeah! Hot damn, shit

She want money, she want car, she want jewelry
Wants it all, still want more, yeah she want everything
What next? Request a cheque? And I said shit man, to
pay her credit card
Got nowhere to get, that's why she won't be gettin' far

I guess I got off lucky, I guess I got off cheap
I guess I got too goddamn tall and the hill it got too
steep
The way I got to see it is the way it's got to be
I won't forget, never will regret, the day that she left
me

She want she want - man, she took the best of me
She want she want - don't stand next to me
She want all, yeah she want all
She want she want - gave you the best of me
She want she want - couldn't mean less to me
She want all, you bet she want all - she want

Thought I knew what love was for, oh what did I know
Next thing and she was out the door, but I guess that's
much better than
Dead on the floor
I was cruisin' down the lover's lane, called and said she
cruised the avenue

I guess I got off easy, I guess I got off cheap
I guess I got too goddamn tall and she wasn't worth the
keep
The way I got to see it is the way it's got to be
I won't forget, never will regret, the day she chose to
leave

She want she want - makes such a mess of things
She want she want - still want everything
She want all, you bet she want all
She want she want - she want anything

She want she want - anything and everything
She want all, what does she want, she want, she want,
she want all

[Solo]

What I needed was something new, that's what I really
want
Hot damn, look at her, yeah she look at you, yeah she
was really hot
I said, "Baby, you're everything I want", and she said
"You are everything that I want, too" - so the story goes

I guess I got off lucky, I guess I got off cheap
I guess I got too goddamn tall, wonder what you want
of me
The way I got to see it is the way it's got to be
I won't forget, never will regret, the day you set me
free

She want she want - don't mean a thing to me
She want she want - now she set me free
She want all, yeah she want all
She want she want - she can't bring me down
She want she want - don't let her come around
She want all, what does she want, she want, she want,
she want all

[Solo]
