"The Last Dimension"

Visit "[The Last Dimension](#)" on MotoLyrics.com

Visions of a millions of crystals in the sky
It's a way into another world
Standing between parallel and real dimension,
Flight in uncertainty to the creation,

O-o-o,

The star of my legends of life
Shows us the last dimension in the crystal sky
Let's go to the world where we can
Live without temptations, without limited years

My system of mind has a dream code
Danger! Warning in the strange world!
Don't you feel this life can explode?
Weakness! Madness in the dream world!

O-e-hey,

The star of my legends of life
Shows us the last dimension in the crystal sky
Let's go to the world where we can
Live without temptations, without limited years

I see the crystal sky,
It's a way into another world,

The star of my legends of life
Shows us the last dimension in the crystal sky
Let's go to the world where we can
Live without temptations, without limited years
