The psycho logic of the civilized
Controlling thoughts within their eyes
Containment of the chemical
The hidden force within the soul

Fear will come alive
Fear will go
Through the darkness and the woes
There will be a light deep below
The subconscious only knows... fear

The politicians and their freedom fight
When all is wrong, there is no right
The key of lies opening the door
To sacrifices in the holy war

The promise of eternal afterlife
Manipulation, internal strife
Forever-after has a fatal flaw
Religious leaders above the law

Fear will come alive
Fear will go
Through the darkness and the woes
There will be a light deep below
The subconscious only knows...

Fear, fear
Shattering the atmosphere
Fear, fear
Travesty is here

Here, here
Covering the path that's clear
Fear is only what you feel
False Evidence Appearing Real

Black emotions grow on trees of scorn
Seeds are planted from the day we're born
Plucked from the darkness, rushing to the light
Instinct is pulling you to fight or flight

Paralyzed (Paralyzed)
Vilified (Vilified)
Voices within your soul are calling deep inside

Terrorized (Terrorized)
Victimized (Victimized)
False prophets nothing more than thoughts within your
mind

(Solo - Alex)

The penetration of a deep abyss
Along a passage to nothingness
Within the corners of a hidden eye
Is where the sources of evil lie

So if you suffer no end in sight
The veil of fear is an endless night
Through confrontation it will be gone
The night is dark just before the dawn

Fear will come alive
Fear will go
Through the darkness and the woes
There will be a light deep below
The subconscious only knows...

Fear, fear
Shattering the atmosphere
Fear, fear
Travesty is here

Here, here
Covering the path that's clear
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel
Fear is only what you feel

False Evidence Appearing Real...
