oh yeah you know you couldnt cause me any harm
although at times i make it start to then not long
i can see your eyes all know (oh no?)
and theyre telling me your truth
i can feel your heart
especially when its on the roof of my mouth
theres no right or wrong
this isnt a test
and i wont lose my experience
i wont try
to put it aside
but its alright
you know that its alright
its alright
its gonna be alright
and if i told you would you never know to guess
sure whats the point when little often means so much
less
i can see for miles and know
when youre telling me your truth
i can feel my heart
especially now its on the roof of my mouth
theres no right or wrong
this isnt a gesture
and i dont use my experience
i dont try
to let it go by
but its alright
you know that its alright
its alright
its gonna be alright
