"Every Day and Every Night"

Visit "[Every Day and Every Night](#)" on MotoLyrics.com

Your lovely face, your face, I've seen it
And though we are apart, I can't forget it
And every night, and every day
I dream about you some way

Somehow I know, I know, you must remember
How we hugged and kissed last year, December
And every night, and every day
I dream about you some way

And every night, and every day
I dream about you some way

Somehow I know, I know, you must remember
How we hugged and kissed last year, December
And every night, and every day
I dream about you some way

Every night, and every day
Every night, and every day
Every night, and every day
Every night, and every day...
