1-2-3, kick it  
Must be something in the air  
Boys around us, everywhere we go  
Trying hard to break the ice  
Where's the harm in the moving twice as slow  
Girl's got an obligation  
An this kind of situation  
You got to be ready  
You better be there, alright  
Don't hurt to keep the boy waiting  
They love the anticipating  
You got to be ready  
Cause that's what it's like living a girl's life  
What could be better than living a girl's life  
When you got girl power  
You keep on getting offers by the hour  
Yes we do  
Living a girl's life  
got to make the most of what we're giving  
Cause we're living, living a girl's girl's life

Roses on the welcome mat  
Someone must have left them at the door  
Put them right by the door  
When I wear my new perfume  
Might just have to make some room for more  
Girl's got an obligation  
An this kind of situation  
You got to be ready  
Better know what you're gonna say  
so nice to be admired  
I wake up to feel inspired  
got to get ready  
To face those boys today  
living a girl's life  
What could be better than living a girl's life  
Cause we're living, living a girl's girl's life

Don't hurt to keep them waiting  
Cause we know what they're contemplating  
I mean, what's a girl supposed to do

Baby, chill out, we got work to do  
living a girl's life  
What could be better than living a girl's life  
When you got girl power  
You keep on getting offers by the hour  
Yes we do  
Living a girl's life  
got to make the most of what we're giving  
Cause we're living, living a girl's girl's life

Living a girl's life is the only way to go  
Like somewhere over the rainbow  
You know there's a place you wish for in a lullabye  
When you're living a girl's life  
You don't even have to try  
It's the way that we walk, we talk and how we dress  
But I must confess we just couldn't careless  
About the bummers that stared  
And the hype that you say  
Cause we're living a girl's life, okay  
living a girl's life  
Cause we're living, living a girl's girl's life  
Living a girl's life is the only way to go  
Like somewhere over the rainbow  
You know there's a place you wish for in a lullabye  
When you're living a girl's life  
You don't even have to try  
It's the way that we walk, we talk and how we dress  
But I must confess we just couldn't careless  
About the bummers that stared  
And the hype that you say  
Cause we're living a girl's life, okay
