Let's go, let's just get away from here
Let's find a place under the stars
Let's be the people that we want to be
Let's live like we could never part

'Cause I only wanna be with you
And I only wanna be with you
Yeah, I only wanna be with you
All of the time

'Cause I only wanna be with you
Yeah, I only wanna be with you
And I only wanna be with you
All of the time, all of the time
All of the time, all of the time

Everytime I hear you sing I love, love, love you
Everytime I hear you sing I love, love, love you
Everytime I hear you sing I love, love, love you
Everytime I hear you sing I love, love, love you
