(Verse 1)

Its quarter past 5 and it feels like another dimension
Everybody knows that we're going out tonight
Somebody says no and thats when I remember to
mention
We're gonna party party like its nineteen ninety nine

(Bridge)

So pick me up lets go
Go far away from home
It doesnt matter where coz baby I just wanna roll
We're putting on a show
Variety's in vogue
Lets do it, Lets do it, Lets do it

(Chorus)

You can take the darkness out of the night
You can take the tick tock out of time
Go and take the angry out of the world
But you cant take the party...
You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies and pearls
But you cant take the party out of the girl
You cant take the party out of the girl

(Verse 2)

Paris in the spring and New York in the middle of
summer
I dont care where we go as long as everyone is there
And if it feels slow we'll dance until it sounds like
thunder
And when the ground starts shaking thats when you
know you better beware

(Bridge)

So pick me up lets go
Go far away from home
It doesnt matter where coz baby I just wanna roll
We're putting on a show

Variety's in vogue
Lets do it, Lets do it, Lets do it

(Chorus)

You can take the darkness out of the night
You can take the tick tock out of time
Go and take the angry out of the world
But you cant take the party...
You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies and pearls
But you cant take the party out of the girl
You cant take the party out of the girl

(Verse 3)

Take me away
From my vanity
I just want to play

(Chorus)

You can take the darkness out of the night
You can take the tick tock out of time
Go and take the angry out of the world
But you cant take the party...
You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies and pearls
But you cant take the party out of the girl
You cant take the party out of the girl
