"Save Your Breath"

Visit "[Save Your Breath](#)" on MotoLyrics.com

Let me outside so I can breathe
I'm already flesh and blood
At least that's what I think

Hand me your card and go sit still
You don't really wanna call
I bet you never will

And if you stray you wont get far
You get reeled in politely
And if you stay you learn to crawl
You won't get hated nightly anymore

And we're waiting for the first time
And we're hoping for the best
We appreciate your kindness
We love you all to death
But you should probably save your breath

Let me back out so I can leave
I don't want this anymore
There's nothing up my sleeve

And if you stray you won't get far
You get reeled in politely
And if you stay you learn to crawl
You won't get hated nightly anymore

And we're waiting for the first time
And we're hoping for the best
We appreciate your kindness
We love you all to death
But you should probably save your breath

Roll on chasing dreams
Don't take me from this song
I ought to be gone
