As I stroll the ever ways of the buddha masters

As I smoke my joint I feel one with the earth

But a brother like me keeps on walkin to get to the
next sign then blaze the next joint...

*short pause, then outro comes on over "Stoned"
instrumental*

The, physical effects of marijuana

The first sensations may be felt instantly after having
smoked grass

or an hour after having eaten

Usually, they creep slowly into this stoned condition

Inch by inch, sliding upward, but to beatnik

The effects may come upon you, suddenly, and startle
you full force

(The, physical effects of marijuana)

(There are four basic types of marijuana)

Psychologically, sometimes the early psychological
stages

coincide with the early physical stages experienced
while stoned

The famous "mind expansion" comes after the famous
physical sensation

Grass, heightens and distorts

For example, profound revelations

You may THINK you have profound revelations, only to
discover...

*music and fade obscure final words
