Girl its been so long, since I held you in my arms,

so i picked up a pen and paper, and decided to write
you a song.

Things just ain't the same, since you took your love
away,

all i have is dark and lonely days cuz the sun dont
shine my way.

Wish that I could find the words to show you love is
real,

but words just cant express the way i feel.....

CHORUS

You're my angel.....

my sun up in the sky, we've been through hell and back
together,

why you wanna leave me now?

only you can ease the pain i feel and wipe my tears
away,

wonts you fly back home and make me whole again....

Baby not a day goes by, that i dont want to cry

when i think of what we had, and how you walked out of
my life.

all i had was yours to take, till my heart you chose to
break

wish that i could make love to you just one more time
for all times sake.

if only i could find the words to say to show you love is
real,

but words just cant express the way i feel...

CHORUS

You're my angel.....

my sun up in the sky, we've been through hell and back
together,

why you wanna leave me now?

only you can ease the pain i feel and wipe my tears
away,

wonts you fly back home and make me whole again....

(come back home.....)

(come back home....)

cuz without you here beside me, girl my house is not a
home.

only you can ease the pain i feel and wipe my tears
away,

wont you fly back home and make me whole again...

CHORUS X2

You're my angel.....

my sun up in the sky, we've been through hell and back
together,

why you wanna leave me now?

only you can ease the pain i feel and wipe my tears
away,

wont you fly back home and make me whole again....

(you've been gone too long so wont you come back
home
