Do it, do it, all right
Do it, do it, all right
Do it, do it, all right
Do it, do it, all right

You got a mouth
Don't you act like you ain't heard a thing
Who told you to play the victim
You ain't suffering

I see that lazy ass attitude
Hey, let it drop
You got potential come on
Take it to the tippity-top

Come on and show that energy
That you always give out
Use it for something good
Yeah, you know what I'm talking about

Keep jumping, reaching higher
You can't take a fall
Give it all, give it all
Give it all, give it all

Do it, do it, all right
Do it, do it, all right

Got ideas to supply
And a passport to try
Everything we should but don't
Everything we could but won't

Got out backs to the pack
And no plans to take back
Anything we've ever owned
Anything we've ever known

And what happens next
Will be yours now
'Cause we've gotta figure out

If we're gonna show you how

Do it, do it, all right
Do it, do it, all right

We have the right combination
We got everything
And to strike faster than lightning
We raise what we bring

We have the right combination
It ain't time to crawl
Give it all, give it all
Give it all, give it all

Do it, do it, all right
Do it, do it, all right

Got ideas to supply
And a passport to try
Everything we should but don't
Everything we could but won't

Got out backs to the pack
And no plans to take back
Anything we've ever owned
Anything we've ever known

And what happens next
Will be yours now
'Cause we've gotta figure out
If we're gonna show you how

Do it, do it, all right
Do it, do it, all right
Do it, do it, all right
Do it, do it, all right
