Time to wake up, my darling, night is so far - don't care
On the clouds we are lying, you and me - unreal
When I can find your whisper on my skin
I promise you'll never feel the mystery in my voice, it's nervous

I deny the borders, let us be in harmony
No more fake between us, I'll be your melody
I deny the borders, let us be in harmony
No more fake between us, I'll be your melody

Our love not for distance, looking so sweet but burning
I'm your tender mistress, tune of my soul is flowing
Fight for your heart is over, I am your queen forever
Let me be now yours, come and play for you the reason

I deny the borders, let us be in harmony
No more fake between us, I'll be your melody
I deny the borders, let us be in harmony
No more fake between us, I'll be your melody

I deny the borders, let us be in harmony
No more fake between us, I'll be your melody
I deny the borders, let us be in harmony
No more fake between us, I'll be your melody

I deny the borders, let us be in harmony
No more fake between us, I'll be your melody
I deny the borders, let us be in harmony
No more fake between us, I'll be your melody

(I deny the borders, let us be in harmony)
(No more fake between us, I'll be your melody)
I deny the borders, let us be in harmony
No more fake between us, I'll be your melody

I'm your melody
