"Come A Little Closer"

Visit "[Come A Little Closer](#)" on MotoLyrics.com

Over the years I've tried to be a better man
Over the tears that I've lied and I've cried
Over the hill they say lies the better land and I know we
can survive
Come a little closer we can make it all work out tonight
Come a little closer make me see it will be alright
Come a little closer we can have it all tonight
[guitar]
People drift apart when they're feeling lonely
And lovers drift apart when they're running scared
Strangers in the night beckon to you only whisper my
name and I'll be there
Oh won't you come a little closer...
[guitar]
Come a little closer...
Oh when your touch is cold and time lies between us it
hurts so bad just barely alive
We cannot let our wonderings deceive us heaven
knows we can survive
Come a little closer...
Oh won't you come a little closer oh yeah come a little
closer
Come a little closer come a little closer
