Watch out!

Here it comes

It's just like pulling off a band-aid

It shocks you but rocks you awake

You start to shake, but not in a bad way

You're gonna get it in your head someday

You'll find a way

You got what it takes, and you're gonna do it

Chorus:

So what will it take for this ice to break

For this mood to change?

What will it take?

You're learning the hard way

It's easier than you think

Do you hear what I say?

Is there anybody in there?

Yes, but it don't feel that way

I hear what you say, but my mind's in the way

Can you come back another day when I'm not so gray?

No, it's too bad today is the only day, so do it

(Double chorus)

Do you know what you're doing?

Does this make any sense at all?

Do you plan on improving?

Are you just waiting for the call?

Are the walls closing in?

You've got to climb over them

(Double chorus)
