Well, this summer's been good from the start
And it looks like we never shall part
Where are we going?
I don't know
How do we get there?
So and so

Well, this summer's been good from the start
Yes, this summer's been good from the start

Well, we slept underneath all the stars
And we talked about girls seen from afar
What's her name now?
I don't know
How do I get to know?

Well, this summer's been good from the start
Yes, this summer's been good from the start

And years from now why am I dreaming
Of a time when I'll be leaving?
Yesterday has not gone easy
But it's you I believe in

Well, we're drinking the dew off the leaves
And the sun's come easy like you would not believe
Where are we going?
I don't know
How do we get there?
So and so

Well, this summer's been good from the start
Yes, this summer's been good from the start
