

## Gossip, The "California"

Visit "[California](#)" on MotoLyrics.com

I've been in this place a thousand times  
And to walk away never crossed my mind  
But there's a dream buried deep down in my soul  
I'm gonna take that road and see how far it goes

California here I'm coming  
I hope you got what I've been searching  
I've been waiting all my life for a chance like this  
I left the key to the house by the coffee cup  
With a note you can read whenever you wake up  
And if you get a chance will you remember me  
When I'm gone

California here I'm coming  
I hope you got what I've been searching  
I've been waiting all my life for a chance like this  
I left the key to the house by the coffee cup  
With a note you can read whenever you wake up  
And if you get a chance will you remember me  
When I'm gone

It's the pain that lives so deep inside  
I could let it out, but I always hide  
So here we are just like I always knew  
Separated by a broken hearted move

California here I'm coming  
I hope you got what I've been searching  
I've been waiting all my life for a chance like this  
I kept a place in my heart that's just for you  
And I'll never forget the things you'd do  
In another life that seems so far away  
When I'm gone
