The path of your like has become harder and harder  
You always believed I was like  
All the other stupid puppets  
But now I am pulling the cards  
I switched sides now your are  
Locked from the inside  
I will let you swallow your own shit  
And make you feel  
What you have spread over me  
The first step of agony is raw  
Pure pain  
Me ripping off  
Your fingernails  
Flaying the skin  
From your dismembered body  
I know  
You do not  
Believe me  
That is the reason you must die  
Die very slow  
Die in your own misery  
Die alone with no fucking perspective  
In your head  
Full of shit  
All this time of suffering  
Changed my way of thinking  
I feel delighted by killing  
People who deserve to leave  
The world of the living  
Just like you  
I constructed my homicides  
Like killing games  
So that my immolations  
Will have the chance to change  
Their lives  
Just like me
