Who did I think I was foolin'  
No one  
It was you  
Right from the start

When I was with that other girl  
She almost took me for sure  
And then I realized  
It's you I've been looking for

She almost had me talked into believing  
I had forgot about you and  
Who did I think I was foolin'  
No one  
It was you  
Right from the start

Oh when you looked me in the eye  
You really shook me for sure  
That's when I realized  
It's you I've been waiting for

I almost had myself talked into believing  
I had forgot about you and  
Who did I think I was foolin'  
No one  
It was you  
Right from the start

How could I have been so blind to  
Believe I had forgot about you and  
Who did I think I was foolin'  
No one  
It was you  
Right from the start
